

IN THE CLAIMS

1. (Original) A multi-domain liquid crystal display device, comprising:
 - first and second substrates;
 - a liquid crystal layer between the first and second substrates;
 - data lines for applying a data signal on the first substrate;
 - gate lines crossing the data lines to apply a gate signal;
 - pixel electrodes for driving a liquid crystal of the liquid crystal layer;
 - switching devices arranged at each intersection between the gate lines and the data lines; and
 - auxiliary electrode lines extended vertically from the gate lines to control an orientation of the liquid crystal with the gate lines.

2-21. (Cancelled)
